

HONORS PHYSICS – 2017 SUMMER PREPARATION:

Students should use the five PDF files to practice the math skills required for Honors Physics, and then submit the Math Skills Review problems in the Word document **by August 1**. The answers to the practice problems are at the end of each PDF file. Be sure to do at least a few from each of the 6 sheets and check your answers. Be aware that they start easy and get harder. Don't just do the easiest ones! If you find that it's a breeze, then you can go ahead and do the Math Skills Review. If you do have trouble with the practice problems in the pdf practice files, do more of them until you feel confident, and then do the Math Skills Review.

Submit Math Skills Review problems to Dr. Cox: cox@gwcommunityschool.com
